

ROUTINE CLIENT COMMUNICATION IS TIME CONSUMING. REDUCE THIS BURDEN WITH MOBIFER WL TECHNOLOGY

Mobifer

Charter bus operators routinely manage a large number of requests, but only 15-20% convert into actual orders. Each successful booking often demands further coordination, typically requiring at least 3 to 5 follow-up emails.

Mobifer WL technology eliminates back-and-forth by enabling instant bookings, and by automating checkout flows and customer communication. It keeps your shop open 24/7 without extra hassle and the self-serve approach helps reduce staffing costs.

70%

Time saved on handling bookings

Instant

Response time on client requests

25%

Sales revenue increase on ad hoc orders

- Uses smart systems for fast, bus- specific routing calculations.
